

Visual Tools for Thinking (including Thinking Maps®)

'Train the Trainers' Two day course

Monday 6th & Tuesday 7th March 2017

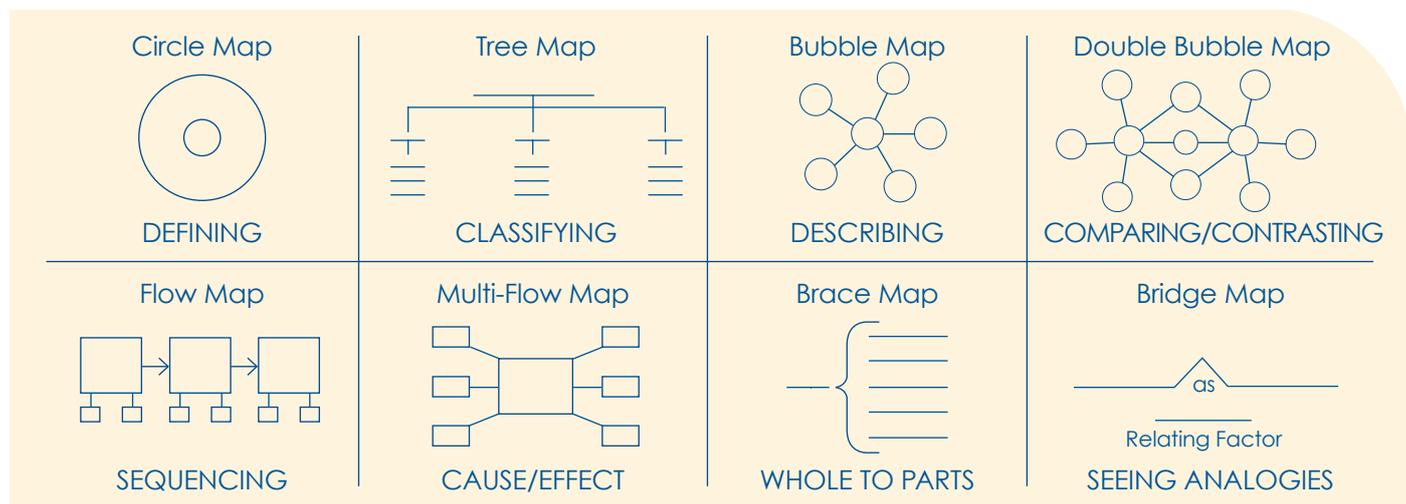

Venue: Hillyfield at the Park, Walthamstow, London

Timings: 9.00am - 4.00pm

This course will explore Visual Tools for Thinking but will have a specific focus on Thinking Maps®.

Thinking Maps® is a language, or tool-kit, of eight thinking process maps, developed by Dr David Hyerle. They focus on the development of and student fluency with the eight fundamental cognitive processes and are introduced to students as tools for reading and writing, content-specific learning, and for interdisciplinary investigations. They are appropriate for learners of all ages and abilities. Over time, students learn to use multiple maps together and become fluent in choosing which thinking processes, with their enabling Maps, fit the immediate context of learning.

10,000 teachers have been trained in hundreds of UK schools, including schools accredited as Thinking Schools by the University of Exeter. In a report from the University of Exeter evaluating the impact of the Thinking School approach, Thinking Maps® were cited as the most important thinking strategy adopted.

Attendance at this course will accredit participants to train other teachers in their school. In addition to the training, participants will receive materials to support them in taking a whole school approach to implementing Thinking Maps®.

Teachers in schools choosing to implement Visual Tools for Thinking will require a support package of resources and there will be a fee for these. (This fee is not applicable if your school has previously purchased these). Details will be sent to you prior to the course. ** Places are limited **

Course fee per delegate: £495.00 + VAT

(includes a copy of the Thinking Maps® Trainer's Guide and Language for Learning folder)
